

NOVEA LINK IN BRIEF

YOUR LOCAL SUPERVISION APPLICATION

A custom application to:

- Retrieve operating information (battery charge status, anomaly, etc.) from the pole paired with the smartphone.
- Quickly view an anomaly.
- Request assistance from our internal support service if an anomaly is detected.
- Download updates to the paired lighting point, available on your app by Novea.
- Manage your fleet through projects and sub-projects and access for your team.
- Test the modulation of your lights in live.

The application is also
available in:

- French
- Spanish
- German
